DIEGO ZULUAGA
Policy Analyst, Center for
Monetary and Financial
Alternatives, Cato
Institute

ABOUT THIS EVENT

As firms continue investing in blockchain, which has endured its first boom-bust cycle, policymakers are considering whether and how to regulate this new technology. In this panel, we will discuss whether policymakers are speeding or slowing the rollout of blockchain and what Congress can do to encourage innovation and protect consumers. For private blockchains, are policies supporting continued investment in auditability, interbank settlement networks, and supply chain safety? For public blockchains, such as Ethereum and Bitcoin, will open protocols usher in new innovations in networked communications, or might the technology fail to gain traction? Should light-touch regulation, if any, apply to crypto-asset markets?

Join us for a lively discussion about what Congress should consider as it seeks to make policy.

LOGISTICS:

When: March 15, 2019

Time: 12:30pm to 2pm

Where: Congressional Meeting
Room North (CVC 268), U.S.
Capitol Visitor Center
