

TPI Aspen Forum Roundup

Your guide to the 2021 Aspen Forum

Photo by Jonathan Zuck

About This Year's Forum

This year's TPI Aspen Forum looked a lot different from past Forums, but we were pleased to offer a packed schedule in a safe environment.

We made health safety a priority by requiring all attendees be vaccinated, have a negative COVID test, and wear masks indoors, as well as holding meals and working groups outside. Safety precautions went off without a hitch, and guests were still able to enjoy great programming and those magical Aspen views. To relive the experience, explore this flyer.

Panel Summaries: 3 Key Takeaways from Each

The Government's Role in Promoting Science and Technology

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: The Government's Role in Promoting Science and Technology

Ashish Arora

Senior Associate Dean for Strategy and Rex D. Adams Professor of Business Administration, Fuqua School of Business, Duke University

Linda Cohen

Professor of Economics and Law, University of California, Irvine School of Law

Kaye Husbands Fealing

Dean, Ivan Allen College of Liberal Arts, Georgia Institute of Technology

Prem Natarajan

Vice President, Alexa AI and Head of Natural Language Understanding, Amazon

Scott Wallsten (moderator)

President and Senior Fellow, Technology Policy Institute

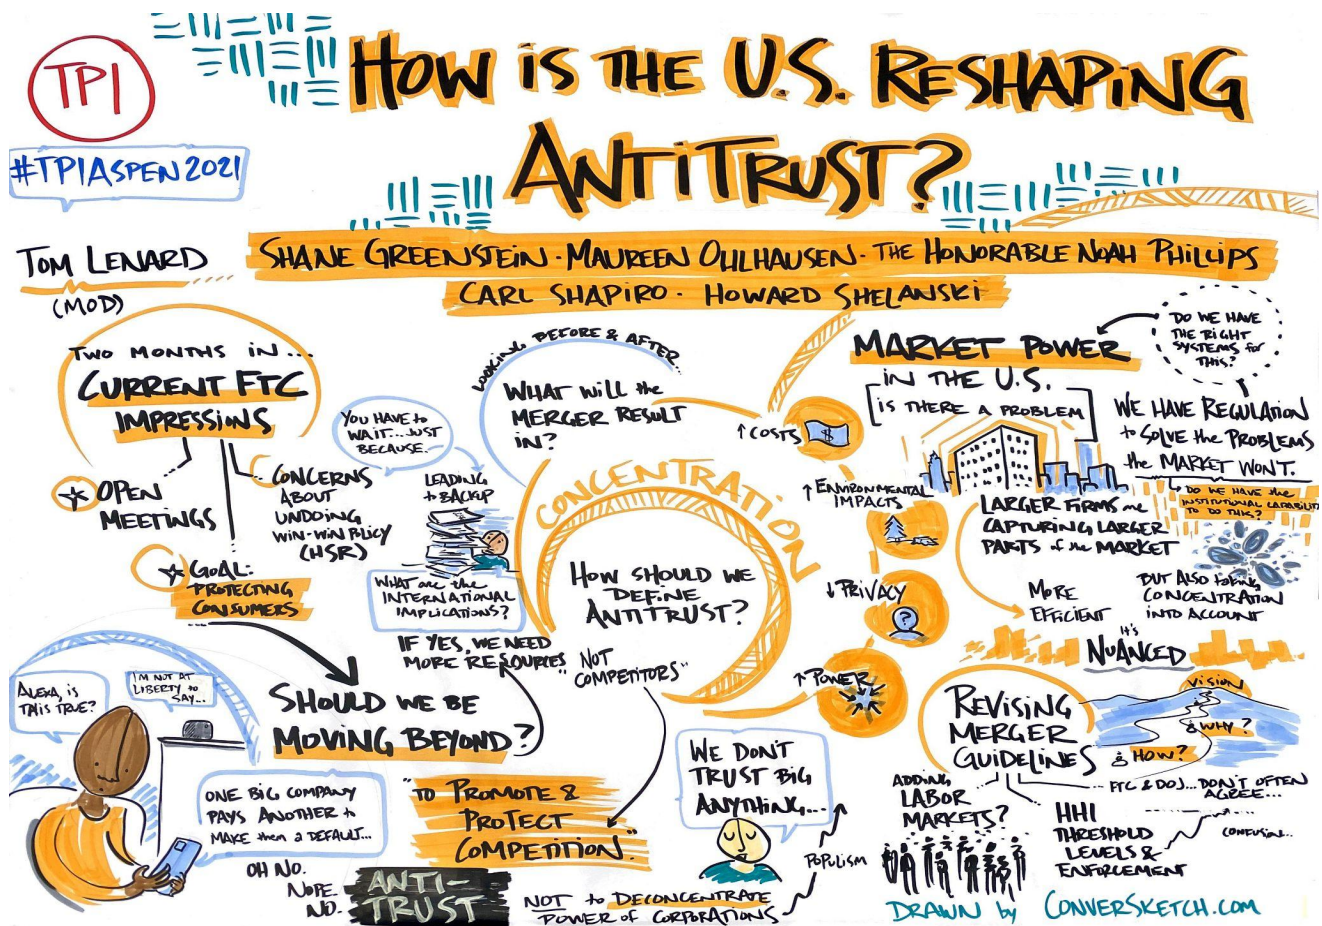

The Government's Role in Promoting Science and Technology

Panelists: Ashish Arora, Linda Cohen, Kaye Husbands Fealing, Prem Natarajan, Scott Wallsten (moderator)

1. Over the past 50 years, S&T research has moved from being concentrated in individual, large labs to a more decentralized approach with more collaboration. This change appears to have been good for innovation in areas like pharmaceuticals and information technology, but less good for innovation in areas like materials and energy, which have lagged, relatively speaking.
2. Some government agencies have made progress in creating within-agency, cross-area collaborations (ARPA-E is one example), but cross-agency collaboration remains rare. That is, government has successfully worked to break down barriers to within-agency silos, but not cross-agency silos.
3. Energy research has historically suffered, as each administration is reluctant to continue research started by previous administrations.

How is the US Reshaping Antitrust?

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: How is the U.S. Reshaping Antitrust?

Shane Greenstein
Martin Marshall Professor of Business Administration, Harvard Business School

Maureen Oulhausen
Partner and Co-chair, Antitrust & Competition Law Practice Group, Baker Botts

Carl Shapiro
Professor, Haas School of Business, University of California at Berkeley

Noah Phillips
Commissioner, Federal Trade Commission

Howard Shelanski
Professor of Law, Georgetown University and Partner, Davis, Polk & Wardwell

Thomas Lenard (moderator)
Senior Fellow and President Emeritus, Technology Policy Institute

How is the US Reshaping Antitrust?

Panelists: Shane Greenstein, Maureen Ohlhausen, Noah Philips, Carl Shapiro, Howard Shelanski, Tom Lenard

1. Perception (true or not) that antitrust enforcement has been too permissive and allowed some companies to become too big and industries too concentrated has led to a populist movement that wants to make antitrust more strict.
2. Antitrust analysis could, and some reasonably argue should, explicitly take into account more than price effects of mergers, like effects of labor markets, the environment, and political influence.
3. Antitrust is not the cure for all of society's ills. Antitrust is about promoting and protecting competition. Considering a wider range of potential merger effects might be useful, but it should be done carefully. Such a move risks turning antitrust agencies into general regulators, requiring them to make tradeoffs among objectives for which they are unqualified.

HOW IS THE U.S.
RESHAPING ANTITRUST?

A Discussion with the Facebook Oversight Board

HOW IS TECH RESHAPING THE POST-COVID WORLD?

A Discussion with Facebook Oversight Board Members

Michael McConnell
Co-Chair, Facebook Oversight Board

Julie Owono
Member, Facebook Oversight Board, Executive Director, Internet Without Borders and Fellow, Digital Civil Society

Cat Zakrzewski (moderator)
Technology Policy Reporter, The Washington Post

A Discussion with the Facebook Oversight Board

Participants: Michael McConnell, Julie Owono, Cat Zakrzewski

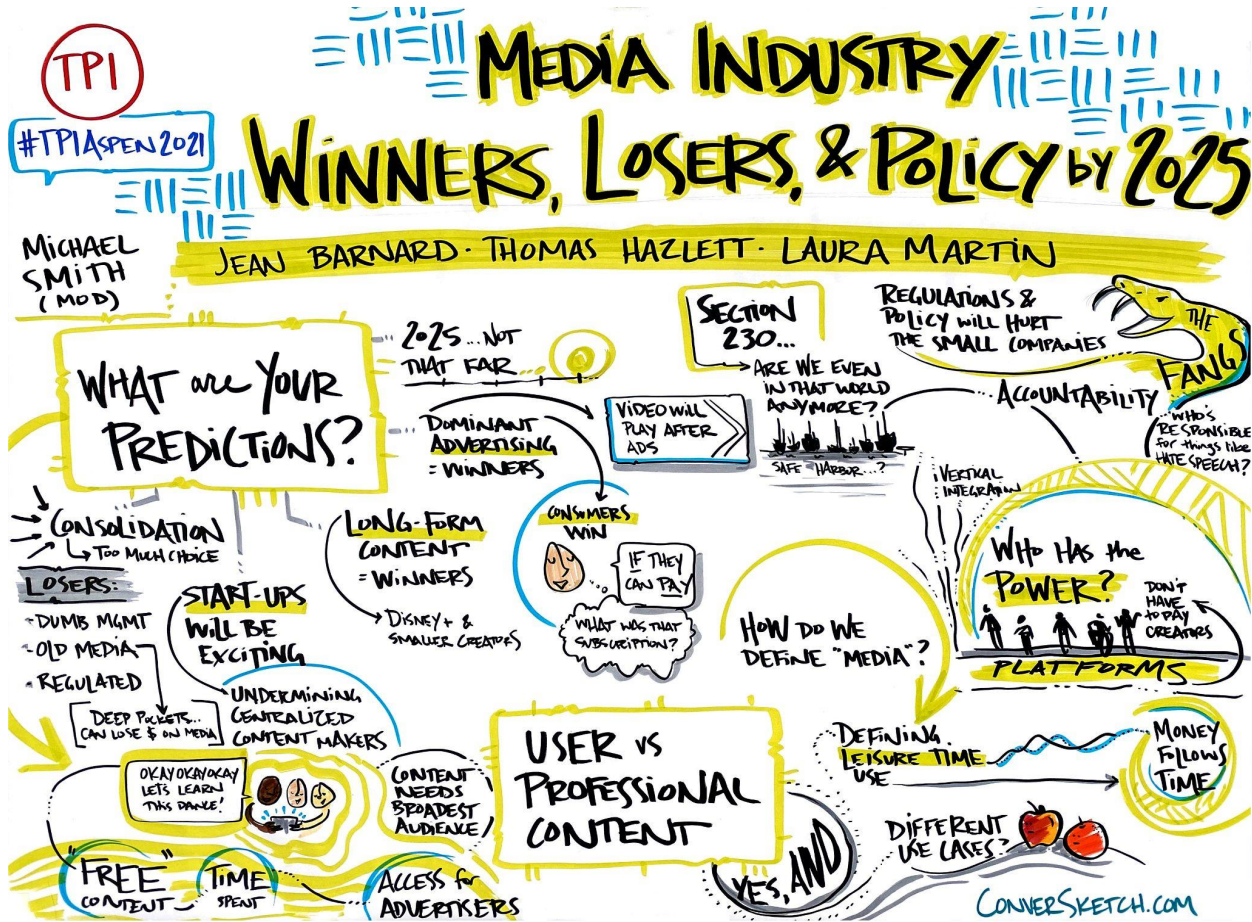

1. Making recommendations is turning out to be the most important contribution of the Board.
2. The Board is helping Facebook figure out how to implement policies and recommendations consistently across services as well as create transparent rules and processes regarding actions like account suspensions..
3. The Board is developing metrics to measure its success and plans to release a year-end report showing the results.

**A DISCUSSION WITH

BOARD MEMBERS**

Media Industry Winners, Losers, and Policy by 2025

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Media Industry Winners, Losers, and Policy by 2025

Jean Barnard
Portfolio Manager and Director of Research,
Kennedy Capital Management, Inc.

Tom Hazlett
Hugh H. Macaulay Endowed Professor of
Economics in the John E. Walker Department of
Economics, Clemson University

Laura Martin
Managing Director, Entertainment, Cable and
Media, Needham & Company LLC

Media Industry Winners, Losers, and Policy by 2025

Panelists: Jean Barnard, Tom Hazlett, Laura Martin, Michael Smith

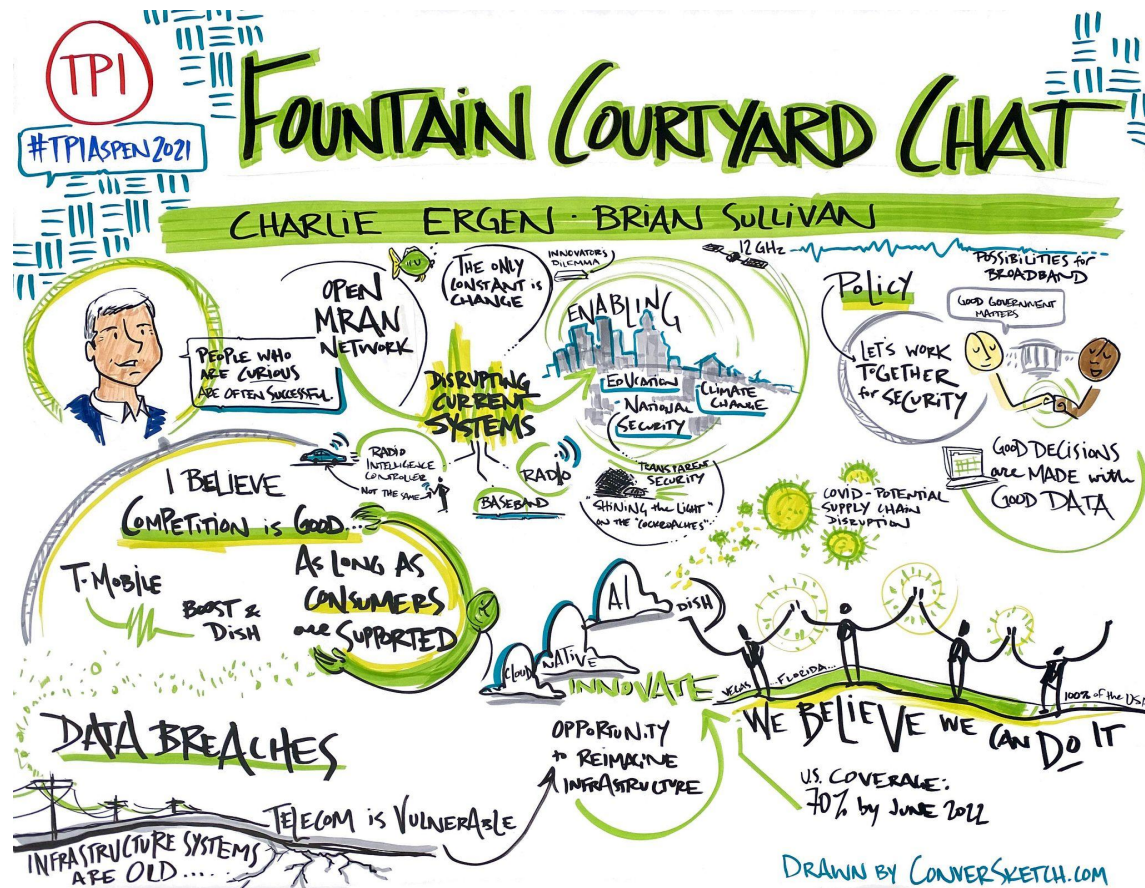

1. Legacy media outlets are at a high risk of being permanently left behind by newer entrants due to the shifting viewing patterns of consumers. Apple and Amazon are well positioned to thrive going forward given their distribution capabilities and deep pockets.
2. Content is king, and platforms have a distinct advantage since they don't have to pay their content creators. People are willing to trade intellectual property for likes and comments, which helps the platforms. Network effects act as a moat that can protect platforms from competition. Enticing users to break from network effects requires new and compelling media.
3. New regulatory measures to govern the space are unlikely. Allowing the market to work is the best course of action because the government is typically slow to react and tends to regulate things that happened in the past as opposed to taking a forward looking view. The big companies competing with one another will be able to outsmart the government and impose costs to entry, making the impacts of legislation negligible.

**MEDIA INDUSTRY WINNERS,
LOSERS, AND POLICY BY
2025**

Fireside Keynote: Charlie Ergen

HOW IS TECH RESHAPING THE POST-COVID WORLD?

FIRESIDE KEYNOTE

Charlie Ergen
Co-founder and Chairman of the Board,
DISH Network and EchoStar

Brian Sullivan (moderator)
Host, Worldwide Exchange and
Senior Correspondent, CNBC

Fireside Keynote: Charlie Ergen

Participants: Charlie Ergen, Brian Sullivan

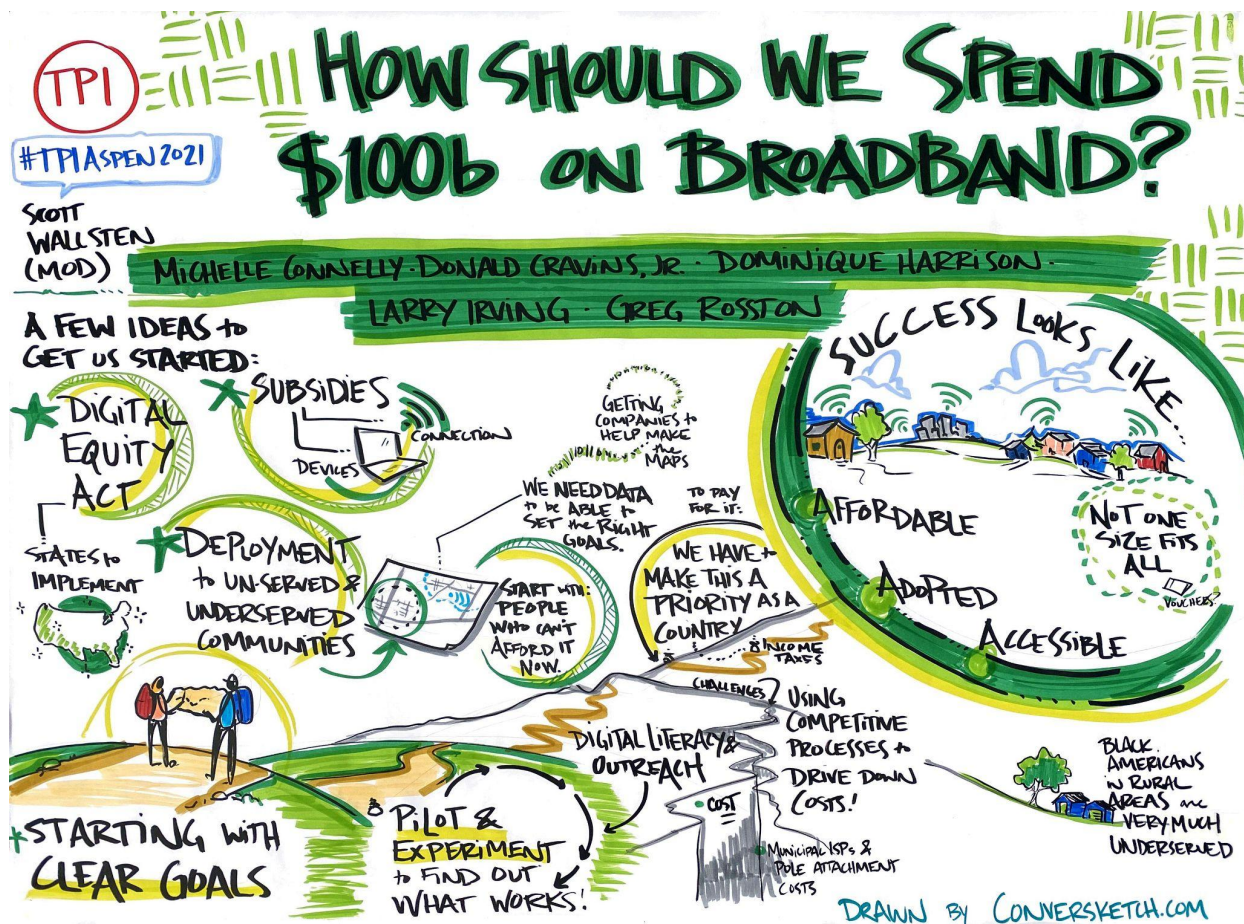

1. Dish is launching the nation's first cloud native, Open RAN-based 5G network. Ergen believes the network will prove revolutionary, allowing consumers to tap into 5G and edge computing solutions unavailable in the past.
2. Dish aims to cover 20% of the market in the first phase. Dish will launch first in cities with friendly regulatory regimes, ample space, and existing infrastructure .
3. The company has already purchased enough equipment to complete the buildout's initial phases, insulating them from the effects of shipping disruptions and chip shortages.

**FIRESIDE KEYNOTE
WITH CHARLIE ERGEN**

How Should We Spend \$100 Billion on Broadband?

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: How Should We Spend \$100 Billion on Broadband?

Michelle Connolly
Professor of the Practice of Economics,
Duke University

Donald Cravins Jr.
Executive Vice President and Chief Operating
Officer, National Urban League

Dominique Harrison
Director, Technology Policy, Joint Center

Greg Rosston
Director, Public Policy Program, Stanford
University and Gordon Cain Senior Fellow,
Stanford Institute for Economic Policy Research

How Should We Spend \$100 Billion on Broadband?

Panelists: Michelle Connolly, Donald Cravins, Jr., Dominique Harrison, Greg Rosston, Scott Wallsten

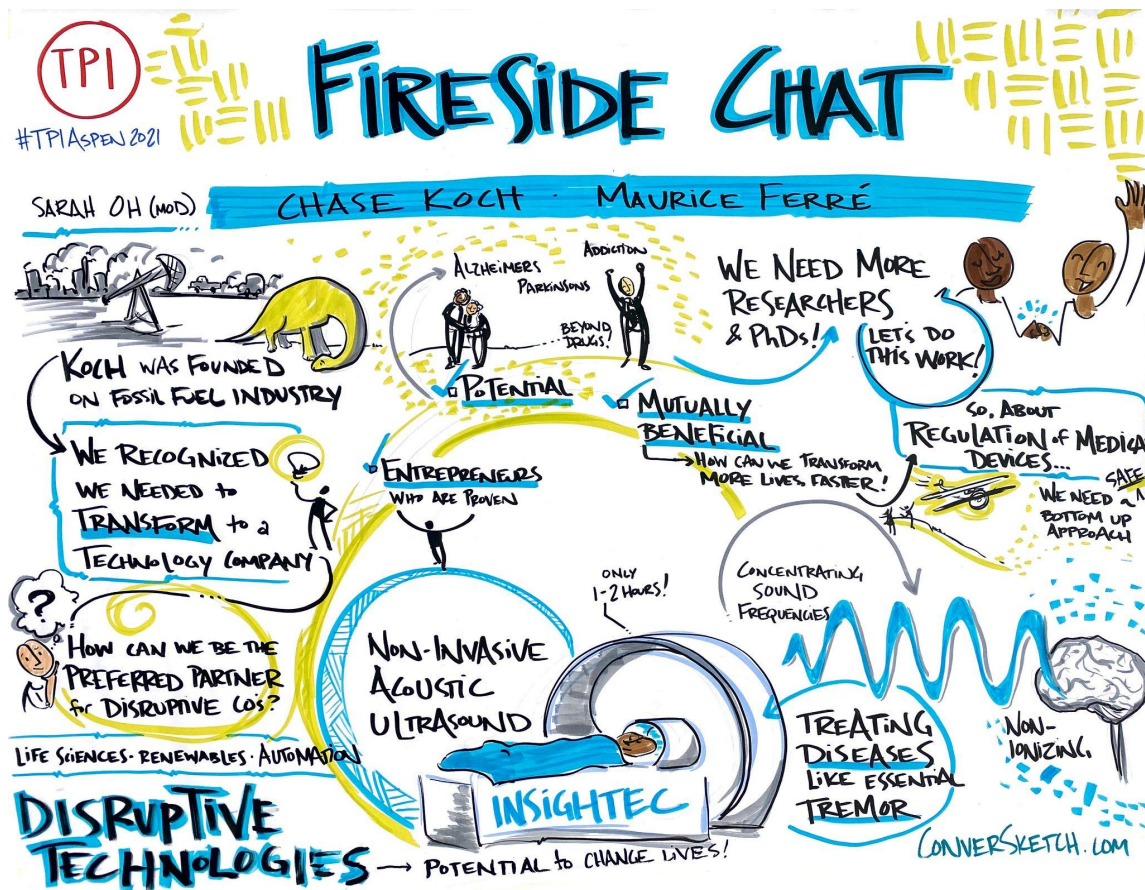

1. The pandemic has made connectivity more important than it was previously. Distance learning, telehealth, and working-from-home all became more prominent and are unlikely to revert to pre-pandemic levels.
2. The large amount of money likely to be spent on broadband should make it possible to make real dents in digital divides, but “throwing money at the problem” is not sufficient. We need to do it as cost-effectively as possible.
3. We should flip the script on our historic allocation of universal service funding: put relatively more emphasis on low-income than we have in the past, while still recognizing that access lags in many rural areas and that places with insufficient access and low-income populations may pose specific challenges.

HOW SHOULD WE SPEND \$100 BILLION ON BROADBAND?

Fireside Chat: Chase Koch & Dr. Maurice Ferré

HOW IS TECH RESHAPING THE POST-COVID WORLD?

FIRESIDE KEYNOTE

Chase Koch
President, Koch Disruptive Technologies

Maurice Ferré
Chief Executive Officer, Insightec

Sarah Oh (moderator)
Senior Fellow, Technology Policy Institute

Fireside Chat: Chase Koch & Dr. Maurice Ferré

Participants: Chase Koch, Dr. Maurice Ferré, Sarah Oh

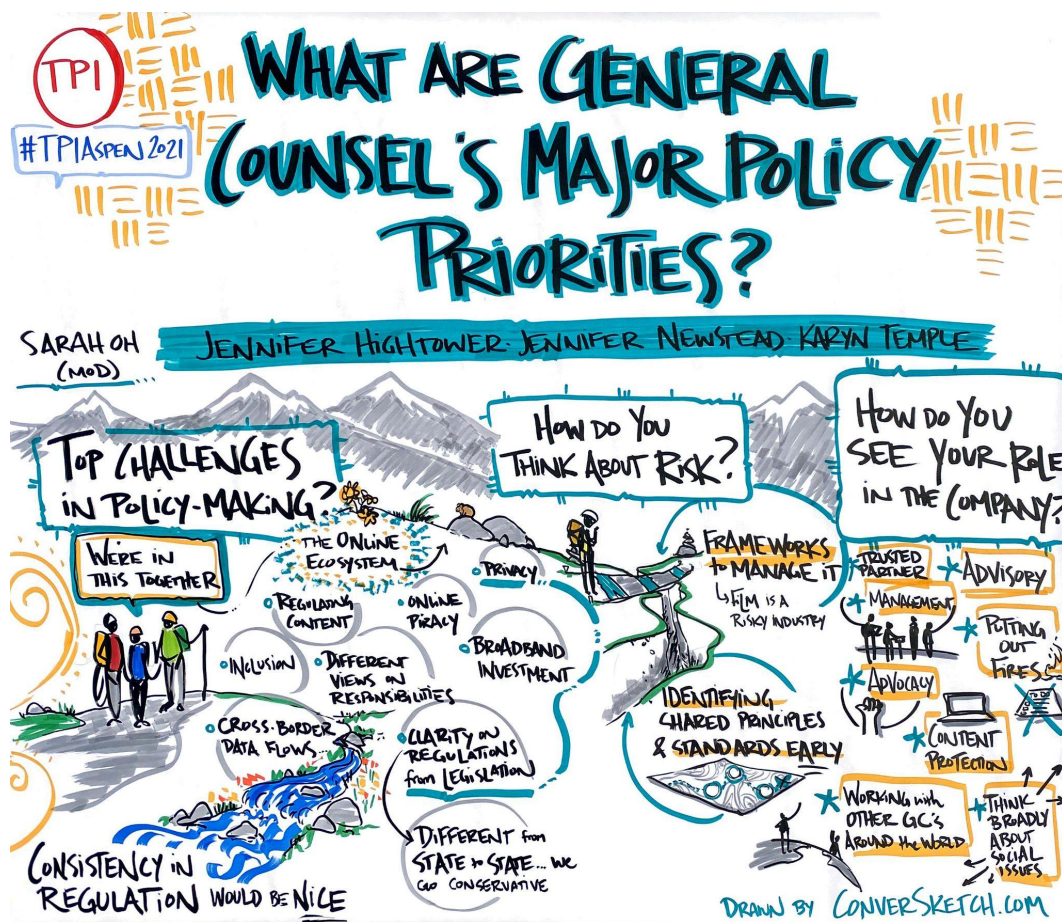

1. New medical technologies like focused ultrasound are the results of decades of innovation related to moving surgery from mechanical to electrical. These non-invasive treatments have the potential to treat a large number of diseases whose treatments otherwise have not improved much over time.
2. The medical devices industry is heavily regulated under a top-down, one-size-fits-all approach that stifles innovation. A better approach would be more flexible and faster to help promote innovation while still protecting patients.
3. Koch industries is transforming itself from an industrial to a technology company and has invested over \$30b so far to do so. KDT is part of that process, and is aimed at “disrupting” Koch’s own businesses as well as others.

**FIRESIDE CHAT
WITH MAURICE FERRÉ &
CHASE KOCH**

What are General Counsels' Major Policy Priorities?

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: What are General Counsels' Major Policy Priorities?

Jennifer Hightower
Senior Vice President and General Counsel, Law
and Policy, Cox Communications, Inc.

Jennifer Newstead
General Counsel, Facebook

Karyn Temple
Senior Executive Vice President and Global
General Counsel, Motion Picture Association

Sarah Oh (moderator)
Senior Fellow, Technology Policy Institute

What are General Counsels' Major Policy Priorities?

Panelists: Jennifer Hightower, Jennifer Newstead, Karyn Temple, Sarah Oh

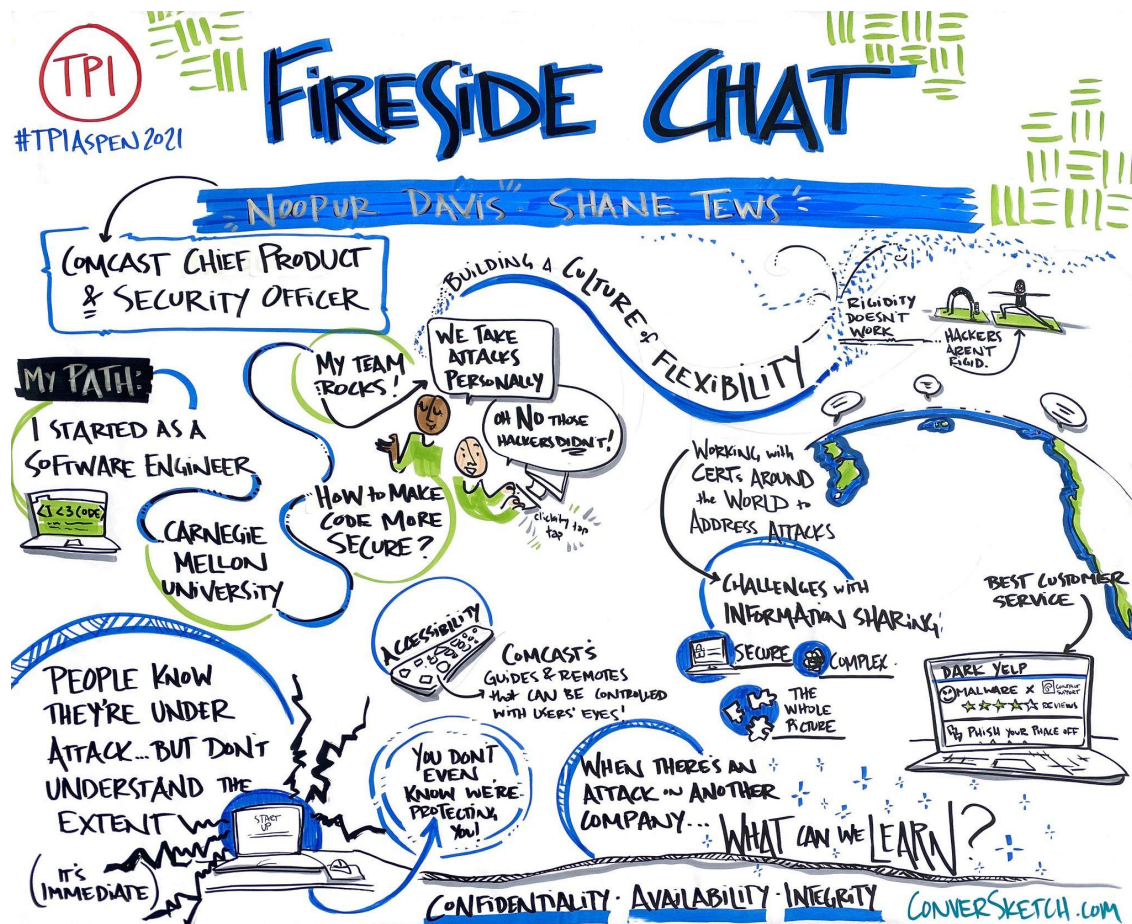

1. GCs are navigating major changes in internet and tech regulation. Internet and tech regulation are likely at an inflection point, with active debates simultaneously on privacy, content moderation, and even size of businesses.
2. Data localization laws threaten existing business models.
3. Companies face legal challenges of dealing with different laws on privacy, data, and other issues across U.S. states and multiple countries. Uniform standards would be preferable.

**WHAT ARE GENERAL
COUNSELS' MAJOR POLICY
PRIORITIES?**

Fireside Chat: Noopur Davis

HOW IS TECH RESHAPING THE POST-COVID WORLD?

FIRESIDE KEYNOTE

Noopur Davis
Executive Vice President, Chief Product and Information Security Officer, Comcast

Shane Tews (moderator)
President, Logan Circle Strategies, and Visiting Fellow, AEI

Fireside Chat: Noopur Davis

Participants: Noopur Davis, Shane Tews

1. The cybersecurity threat landscape changes multiple times per day. Consumers do not realize the extent to which they are under attack. According to a Comcast survey, its customers believe they are subject to 12 attacks per month, when the real number is 104.
2. Cybersecurity has always had three pillars: data confidentiality, data integrity and systems availability. Ransomware is particularly worrisome because it affects all three.
3. Nation-state infiltration into networks is especially difficult to detect because the intruder's goal usually is not to disrupt, but to learn.

**FIRESIDE KEYNOTE
WITH NOOPUR DAVIS**

Does China Need the West?

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: Does China Need the West?

David Gross
Partner, Wiley Rein LLP

Xiaomeng Lu
Senior Analyst, Geo-technology Practice,
Eurasia Group

Samm Sacks
Cyber Policy Fellow, New America

Scott Wallsten (moderator)
President and Senior Fellow,
Technology Policy Institute

Does China Need the West?

Panelists: David Gross, Xiaomeng Lu, Samm Sacks, Scott Wallsten

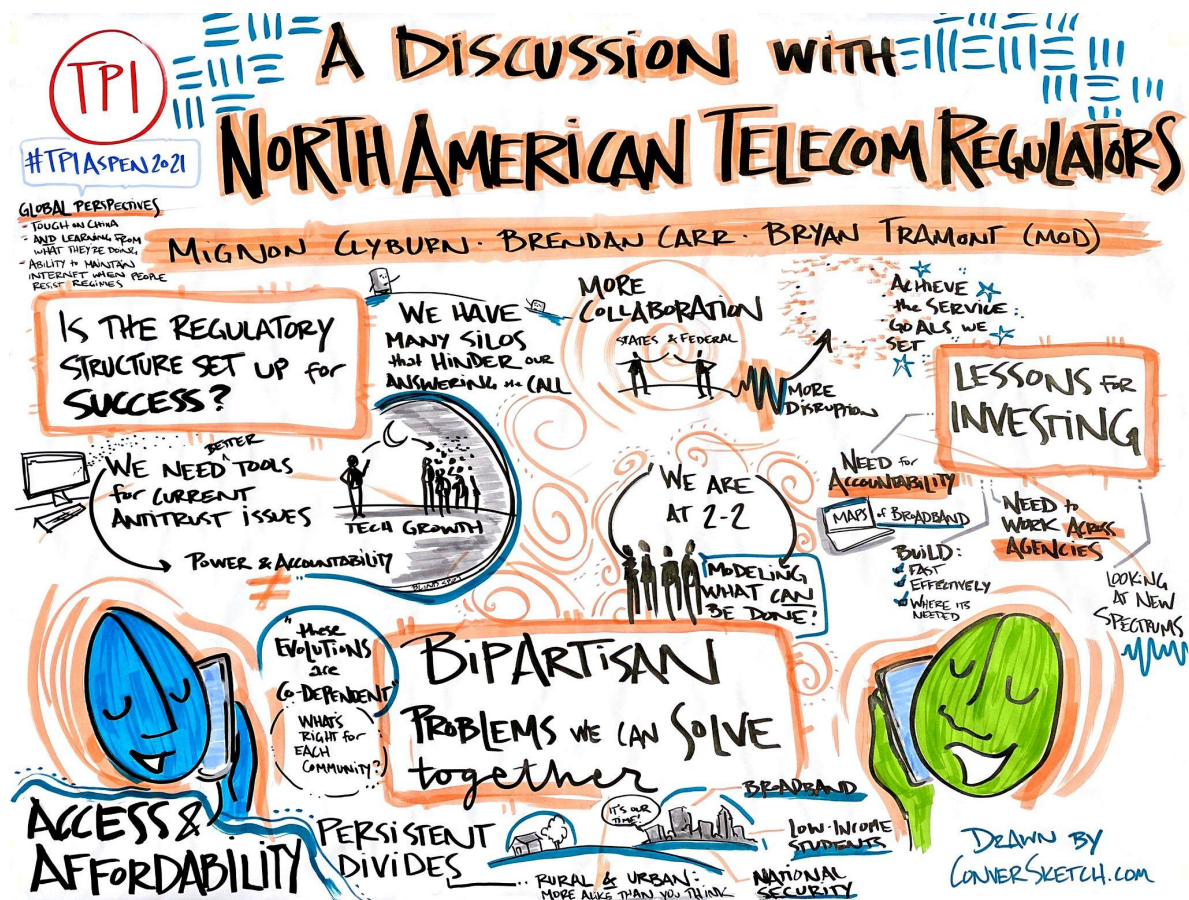

1. The Chinese Government (Communist Party) is trying to align Chinese tech companies' priorities with its own. It is using three methods to achieve this goal: Transferring resources from the tech sector to the rest of the economy; defining controls over data; and - at least with respect to education companies - trying to keep benefits from being concentrated among the elites.
2. China's actions towards its tech companies are not new. Even in the 1990s, companies could enter the market and act more or less without government interference. But if the company became very successful, the firm would suddenly find itself being regulated in new ways.
3. The Biden Administration's approach to China has been surprising. Rather than lifting tariffs, the Administration is keeping them and even not renewing exemptions that the Trump Administration had granted.
4. Bonus takeaway: Read anything by Peter Hessler to better understand China.

DOES CHINA NEED
THE WEST?

A Discussion with North American Telecom Regulators

HOW IS TECH RESHAPING THE POST-COVID WORLD?

Panel: A Discussion with North American Telecom Regulators

Brendan Carr
Commissioner,
Federal Communications Commission

Mignon Clyburn
Principal, MLC Strategies LLC

Bryan Tramont (moderator)
Managing Partner, Wilkinson Barker Knauer

A Discussion with North American Telecom Regulators

Participants: Brendan Carr, Mignon Clyburn, and Bryan Tramont

1. The current structure of two Democrats and two Republicans on the Commission creates an incentive to reach compromises. The FCC has been productive relative to other parts of the government as a result.
2. The \$65 billion the government is currently talking about spending on broadband should be enough to close the digital divide, but we must build accountability into the mechanisms for distributing it.
3. Collaborations between the federal government and states can lead to innovative solutions.

**A DISCUSSION WITH NORTH
AMERICAN TELECOM
REGULATORS**

Media Coverage Roundup

Here is just a small sample of media coverage.

[The Pros and Cons of State Broadband Grants](#)- Kelcee Griffis, Law360
